

Product name

Abrasive

β -POWDER

β -POWDER
(β -TCP cleaning powder)

SEM image of β -POWDER

[Sterilized] **Single-Use Disposable**

Ingredient: β -Tricalcium Phosphate

Contents: 3g x 5 packs

Indications for Use: Cleaning, polishing and restoring natural esthetics of tooth enamel.

Advanced features:

- ① The main constituent of β -POWDER is β -TCP, which is the main ingredient of human natural tooth, allows the powder left on the tooth surfaces to be dissolved by itself.
- ② β -POWDER consisting of the spherical-shaped and uniform particles enables more gentler and more efficient cleaning of natural tooth enamel.
